

Beyond Balance.

Ahead In Careers!

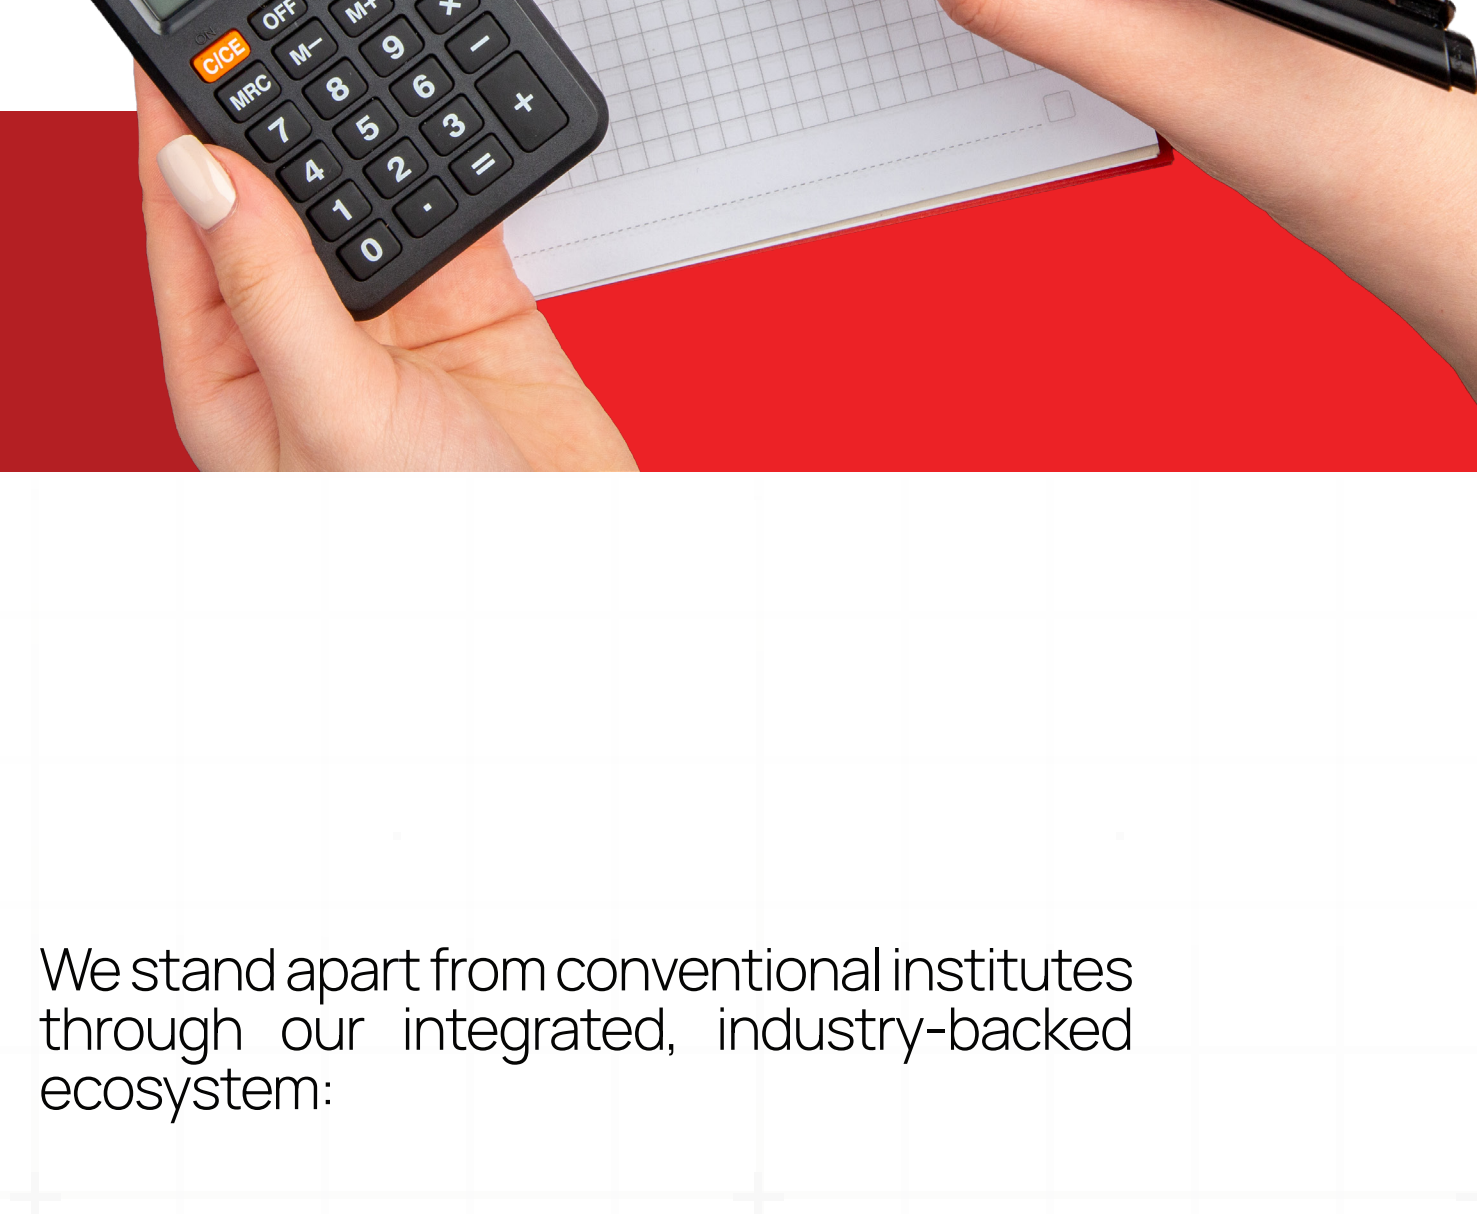

Real Industry Exposure

GAMA offers students more than just theoretical knowledge—they gain industry-level real work exposure through active GCC client projects. Our integrated training facility blends classroom instruction with a practical work environment, allowing students to work on live client projects under expert supervision. This direct industry exposure ensures that every lesson and skill align with employers' expectations.

At GAMA, you don't train on hypothetical case studies—you build real-world accounting, Auditing and GCC Taxation (VAT, Corporate Tax, compliance) experience from day one.

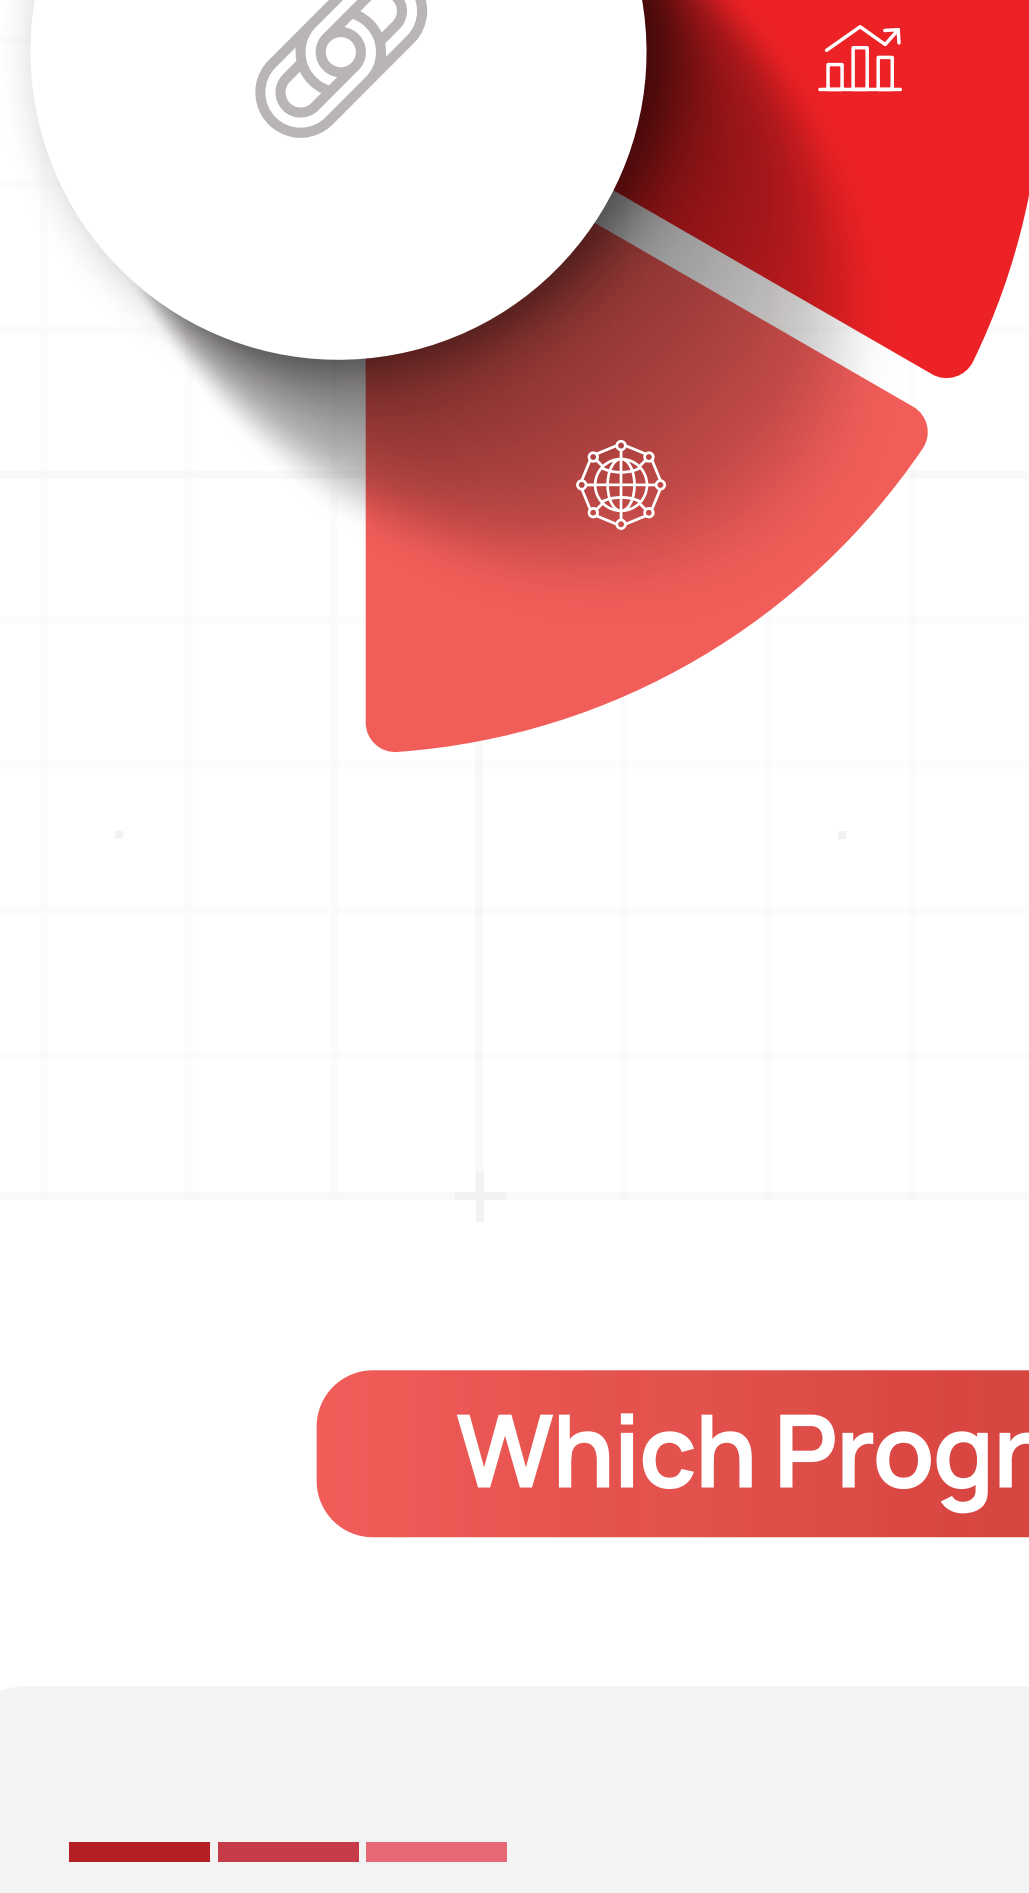

The Industry Gap We're Closing

Commerce students and qualified professionals often face a critical challenge: strong theoretical knowledge but limited practical exposure. Traditional courses focus on exams, leaving candidates struggling to perform in real-world GCC compliance frameworks.

Our Ecosystem

We stand apart from conventional institutes through our integrated, industry-backed ecosystem:

GAMA ————— **THE ACADEMY**

Transforms students and professionals into job-ready experts through hands-on, simulated work environments.

ODIFY ————— **THE INDUSTRY BACKING**

An international auditing firm with ACCA/CA professionals. You learn from practicing experts and train on active GCC client projects across diverse industries.

FINE ————— **THE FINANCE NETWORK**

A lifelong community ecosystem ensuring your learning, networking, and career growth continue well beyond the classroom.
